

"The AR Amplifier Is Like A Life Support System For Troops In Combat."

Tim Harrington
Military Account Manager
Amron International

I spent 20 years in the Marines. Much of that time was in combat. Running reconnaissance missions. I know how critical it is to have an amplifier that's as powerful and dependable as the ones AR Modular RF makes.

Other amps just don't cut it. Not dependable. You turn a corner or walk inside a building and you lose contact. Suddenly you're all alone. But AR's KMW1030 has the power you need. It's like a life support system for troops in combat.

And it's not just that AR makes such an incredible product. It's their service & support. When I need to get amplifiers into the field against an impossible deadline, AR comes through. They support us as if lives depended on their amps. But I hear they do that for all their customers.
