

*“Other amplifier companies acted like we weren’t worth the trouble. AR treated us like we were the only customer that mattered.”*

*Willy Sagun  
Staff Engineer  
Labcyte Inc.*

*We develop liquid handling equipment for the pharmaceutical market. We don’t use a lot of amplifiers, but we needed something special – a smaller version of the AR amps we’d been using.*

*Of course, we called AR Modular RF. But we also got a competitive bid. What a difference! From the start, AR was so much more responsive. They sent a group of technical people out to see us and determine our needs.*

*The other company acted like we weren’t worth the trouble. AR developed a working prototype in about 1 1/2 months. The other company took an additional 3 months; and their cost was double! Even when our specs changed along the way, the AR team never missed a beat. Everyone talks about service and value, but AR really delivered. This is what they mean when they talk about giving their customers a ‘competitive edge.’*
